## 2. Prior to the installation READ SAFETY INSTRUCTIONS

- Check water quality and pressure
- Define filter type and size and check space inside counter
- If no descaling cartridge is used, install carbon filter as minimum
- Check that the machine is on flat and stable surface
- Check counter cut out
- Check water supply installation
- Check that power supply conforms to local standards
- Check that power supply conforms to the machine settings
- Check that the machine is the only device on this power line
- Check all with customer on site
- Make sure original coffee is available
- Check drink recipes and cup sizes

## 3. After installation

- Explain cleaning and instruct staff using Quick Reference Card (QRC). Download here: https://bit.ly/2VYO08O.
- Save the machine data to an USB stick and send it to data-upload@eversys.com. Refer to: https://bit.ly/3yTzsWo.

## Min. height required to refill/remove bean hopper

1. Drain with siphon, input min. $\varnothing 56 \mathrm{~mm}$.
2. Electrical socket according to local regulation and RJ-45 connection (e'Connect).
3. Drain hose - Make sure that there is no dip or any back pressure in the hose. The hose must always flow downwards.
4. Undercounter ground coffee disposal (option).
5. Main water braided pipe.
6. Check valve according to local regulation.
7. Descaling cartridge or carbon filter as minimum.
8. Pressure reducer output - Only if water pressure exceeds 4 bars (58 psi).
